MORE THAN 5.800 DIMENSIONS

standard washers

Haemers sa produces all flat washers in accordance with the standards DIN, ISO, AFNOR NFE, PENNY,...

To do so we have 9 automatic press lines which monthly produce over a 150 ton of washers in steel, stainless steel and other kinds of material.

Packaging can be done in carton boxes, polybags both with barcode, article-nr,

washers acc. plan

Haemers sa produces all washers according plan, design or model from the client. Tolerances of 0.05 and 0.1mm are certainly not an exception. These washers are perfectly flat and stamped with the biggest care.

up to 400T force, 20mm thickness

small quantities

Haemers sa is convinced also to be of service to you with smaller quantities. We can even be an alternative for laser and punchmachinery. Our dies are mostly built like puzzles which rules out the tooling cost.

Components can also be provided of threading, chamfers, small welding,....

larger and XL quantities

Haemers sa has an extremely efficient and modern machinery which enables us to be very competitive when it comes to larger quantities.

Design and production of the tooling is done within the company and this guarantees the continuity of the production and the delivery time.
